A world class drying experience for your food products

Oil mills – No more hassles to dry copra, groundnut, castor and other oil seeds. Grab the high returns from coconut oil business through solar dried copra. Make use of solar dryer to derive wide variety of products out of coconut.

Fish products – Opt our solar dryer to get export quality dry fish, which is free from dust and microbes. Need not bother about birds and animal intruders. Fix it and forget it. We will take care of your favourite food products.

Fruits and vegetables – Avoid deterioration of fruits / vegetables through sun drying. Take advantage of solar dryer for value addition of fruits and vegetables. An energy efficient and economical means to preserve food as compared to cold storage. Join us to prevent post harvest losses.

Masala Companies – One stop solution to dry all your spices and ingredients. You can get beautifully dried green cardamoms and all natural green fennels as well. Spices never lose their aroma, retain their colour and texture in a solar dryer.

If you have a LPG / furnace oil / electric dryer, then no problem. Attach Effimax solar dryer with any existing drying system to reduce its fuel cost half the way. Of course, it is maintenance free too.

If you think of your home, we have our small Home Solar Dryer to dry your day to day products like chips, papads, dried fruits, flours, vadagam, etc. Keep moulds and insects away from your food products.

What are you thinking for? We are here to serve you.

Solar dryer to save food, eat healthy and save environment.
