WHERE TECHNOLOGY
COMMITMENT IS TRADITION.

 www.macwellcotteng.com

THE COMPANY

Macwell Engitech was incorporated in the year 2008. Today We are a renowned manufacturer and supplier of cotton processing machine, raw cotton processing machine and ginning machine. We provide one stop solution for machinery Equipments. Only best quality goods are furnished by our company to the customers for earning a good image in the Industry. Our company has earned immense respect from the customers for manufacturing world class products at nominal prices. We maintain proper quality in our products to bring out High efficiency from them. The durability and strength of our products is the best in the domain. We send completely satisfied customers from our end.

We believe, If you have to offer the world something unique, the means & manners used to produce the same need to be equally unique as well. With this core philosophy, Macwell does a lot of value addition at every stage, taking great care to make all its technology absolutely unique and of the finest quality.

 15 YEARS OF EXPERIENCE
  120+ PLANT INSTALLATION

TROLLEY SYSTEM

Trolley system is easy, efficient and compact for ginning automation, it can increase production by 20-25% compare to other alternatives. Our precious design will help you out to reduce maintenance cost

& cotton wastage. As the current scenario transforming to green energy we'll make sure our machines are lesser power hungry then our competitors.

WORDBOX

Macwell's prestigious & powerful word box made from Hi-Grade metal & sheets. PLC panel will be installed for best operation. It has a powerful cycloid gear which is used for easy transmission. Our wordbox having ability to sponge the lint better way then others and it will beneficial for DR feeding. along with all other features wordbox is equipped with advance system for easy exhaust of lint.

BELT CONVEYOR

Belt conveyor mainly used for easy transporting of row material, it has a totally folding lint belt. Rubber belt installed with this Machine is made from the best

rubber materials for conveyor system. We use specially designed lint belt To reduce noise, friction & tear of belt.

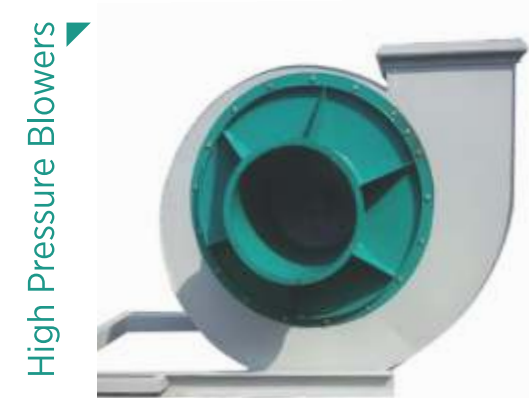

VACUUM SYSTEM

The quality controllers of our team ensure that this air separator is stringently monitored on various parameters. These are extensively appreciated for high strength, optimum performance, robust construction, corrosion resistance, low running cost and longer functional life.

Cyclon

High Pressure Blowers

SCREW CONVEYOR

Screw Conveyor mainly used for transporting cotton seeds. Our screw conveyor is popular for its durability, quality in accordance with international standards, flawlessness, resistance against corrosion and easy installation.

ELEVATOR AND OVERHEAD CONVEYOR

We are expert in Elevator & Overhead Conveyor, moreover ensuring constant movement of wide range of material in the overhead track. Our hands-on experience and deep technological knowledge empower us to develop the technology that decreases the environmental effect during its entire operational life cycle as well as lowers the operational and maintenance cost. we have established a reput for swiftly meeting challenges pertaining to automation technology.
