Specially Designed to Store
DAIRY PRODUCTS
an an Ideal 1°C to 11° C

Get uninterrupted power supply & cold storage for 24*7
and reduce spoilage of the products

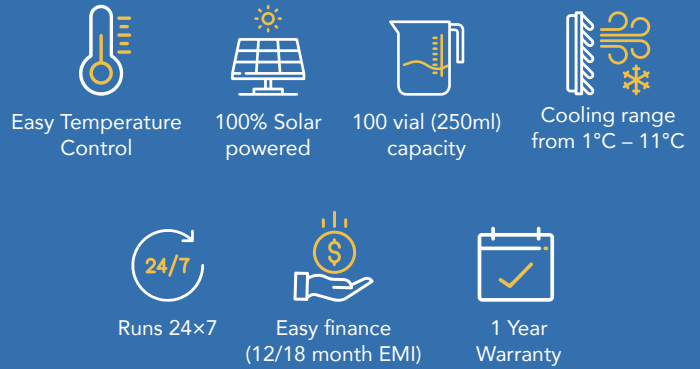

DD SOLAR DAIRY COOLER

Dairy products require consistent cooling to remain fresh and consumable. With frequent power cuts for longer durations there can be issues of food spoilage and wastage generating losses to the entrepreneurs.

DDSolar's Dairy Cooler is a cooling solution specially designed to store dairy products at recommended temperatures. It comes with solar panels and a battery. It runs 24/7 on solar power, decreasing your electricity bills drastically.
