

DD SOLAR FISH CHILLER

Specially Designed to Store
FISHES & SEAFOOD
at an Ideal 2° to 4°C

No more spending on ice daily and reduced spoilage
of the products!

DD SOLAR FISH CHILLER

Fish & seafood need a low-temperature cold-storage unit that can be expensive. Any interruptions in power can cause spoilage and wastage of products. How can we combat this problem?

Introducing DD Solar Fish Chiller. The cooling unit runs entirely on solar power without being dependent on the grid. With easy temperature control, pick the perfect temperature you need!
