Our Profile

We EcoGreenUnit is a Social Enterprise started in the year of 1999@Sethumadai village,in Coimbatore District foot hills of western Ghats. We focus on Agro Based Projects Especially in Areca Leaf plates making project, Banana fibre project, Coir pot making projects.

We have designed and developed Areca Leaf Plates Making Machinery in the year 2000.Slowly the project is been promoted among farmers ,women groups and small entrepreneurs. The quality Advanced Technology machines is been developed in due course and the training in identification of Raw materials, Operation and maintenance of the machinery ,Quality Production out put , Marketing Knowledge and the linkages has been thoroughly taught to the above mentioned category . So far 12500 Entrepreneurs all over india ,Mostly women Entrepreneurs are engaged in this sector,

Banana fibre project

Started in the year of 2003.This Particular idea is been conceived and delivered with the good quality well designed machinery for extracting the banana fibre from the wasted pseudo stem which is accumulated in huge after harvesting the banana .Disposal of these stems are Heretic. in this scenario Extraction of fibre plays a vital role by giving an extra income of Rs 10000 per acre for farmers. It's a wealth out of waste concept.Near about 9000 Entrepreneurs especially farmers, women groups are benefitted in this venture. Apart from that Banana fibre mat weaving is done by women were we

provided them with simple Banana fibre mat weaving handloom unit with out power which can be operated in a small space[10x10Square feet]We Provide Training, Technical know How and Marketing Linkages .This Banana fibre mat weaving project is done by 4500 women all over india. The weaved mat is converted into Handi crafts .

The Banana fibre Extraction machinery is been Purchased by farmers and entrepreneurs those who are in Banana growing sector and near by and then the fibre is been sold to Mat weavers were they weave the mats and the mats is been again sold out to Banana crafts Stitching units near about 1500 units all over india [Mostly women are Engaged in this sector] were they make different kind of Home screens and craft items. The Marketing linkages has been created and marketing support is also been done by EcoGreenUnit. In Banana fibre extraction the wastage after extracting the fibre the sap and the solid waste is converted as vermin compost and its sold for farmers and Nurseries. So it's a zero waste concept.

We focus on Community Based Development Programme through wealth out of waste concepts ,Lively Hood Activities through sustainable Income source.

The beneficiaries in our Projects are Farmers, Transporters, Agricultural labours, Entrepreneurs and the Consumers.

We are ready to impart the training in above mentioned Sectors by providing technology [By means Quality Advanced Technology Machinery and Equipments] Technical knowhow , Marketing knowledge and the linkages .**ITS A ON GOING MISSION FOR THE PAST 23 YEARS**

Government of india is came up with Loans ,Subsides through MSME,DIC, Mudra ,Gem Portal, Start up india ,Make in India, Self Reliant India, DST and Even more...

Our operations are in Thailand,Srilanka,Nigeria, Laos and in costarica.
